Raticator

Baiting Tips

Just like people, rodents can have different tastes and preferences. We've found that ordinary dry pet food is an effective lure for rodents. If you want to try something different as a lure, here is a brief list of some of our staff and customer favorites:

- ★ Dry Nuts
- ★ Trail Mix
- ★ Oatmeal Cookie Morsel
- ★ Candy Corn
- ★ Peanut Butter and/or Chocolate placed in a plastic bottle cap
- ★ Ritz Bitz with Peanut Butter
- ★ Sweet Feed
- ★ Chicken Scratch
- ★ Goldfish Crackers

ANYTHING gooey, oily, or salted should first be place in a plastic bottle cap or you could end up with a mess, or compromise the electronic sensing components. Salted nuts and seeds can cause corrosion to the plates in the bottom of your unit.

Don't be afraid to experiment; if the rodents turn their noses up try something else. Observe what they've been attracted to in your home or yard.
